EDUCATION

JSS Academy of Technical Education

B.Tech Electronics and Communication *CGPA: 8.39*

Noida, Delhi NCR

Aug 2016 - Sep 2020

St John's School Marhauhi - ISC Board

XII in Computer Science and PCM *Percentage: 77.6%*

Varanasi, U.P.

EXPERIENCE

Jugaadu.in

Web Developer

Aug 2020 - Sep 2020

- Worked on building features of explore feed generation, push notifications for news polling app.
- Developed additional REST API's for new features using php CodeIgniter.

SKILLS

Programming: Java, PHP, Javascript, NodeJS, Angular, HTML, CSS, Bootstrap, Codeigniter
Database & Cloud: MySQL, MongoDB, Linux, AWS, Google Cloud, REST, Docker, Git

PROJECTS

Cosmos hub *Angular, Typescript, Materialize, php, Codeigniter, MySQL, Apache*

<https://padmeshkunwar.me/cosmos>

Angular app currently in beta version designed for astronomy lovers with content exclusive to astronomy field. Features include blog publishing, astronomy news updates and mini apps for space simulation using different data sets of space

Foodshala *HTML, CSS, javascript, php, MySQL, Bootstrap* - <https://padmeshkunwar.me/foodshala>

Online food ordering web application with separate Customer and Restaurant roles. Features include Order place, Order history, Cart, Editing Food Menu. All the features are personalized according to user role.

Electrino Website *Bootstrap, Javascript, FirebaseDB, AWS* - <https://www.padmashkunwar.me/seed>

Official website of college society Electrino developed by the web team with me working on discussion Forum using Firebase DB, responsiveness and deployment on AWS.

Docker Chatroom *Docker, Linux, Bash, netcat*

A chat service using linux netcat between master server container and slave containers.

Robotic Prosthetic Hand *Python, MATLAB, Arduino, Artificial Neural Network, Xbee*

Project based on facilitating a Robotic arm to an amputee with movement via EMG Signals from brain. Demonstrated faster learning rate using unsupervised learning and Artificial Neural Network.

Smart Railway Announcement *HTML, CSS, Javascript, Firebase DB, Raspberry Pi, Linux, php* -

<https://github.com/padmash97/sih2019>

Developed IoT based e2e solution in Smart India Hackathon 2019 for railway station announcement system using FM transmission, Web app and SMS services in real time as a solution for the given problem statement under Ministry of Railways and got recognised as "Most Innovative solution".

ACHIEVEMENTS

Finalist

Stood in top 0.18% nationwide in Smart India Hackathon 2019

MHRD, India

July 2019

Semifinalist

Texas Instruments, India and NSRCEL-IIM Bangalore
Recognised for top 100 startup inclined idea out of 10,146 under mentorship of IIM-B.

May 2019

Winner

Won Hackathon for our awesome solution for real world problem statement in Hackfest.

Developer Student Club, IIIT Noida

Nov 2018

EXTRA CURRICULAR

- Led college society Electrino as Vice president in 2019-20.
- Mentored students in different technical workshops in my society related to IoT and Electronics.
- Worked as technical event coordinator in our college's annual fest Zealicon.

CERTIFICATIONS

- Full stack with NodeJS, Express, MongoDB by Coursera and Learning Bash and SEO by Udemy.
