Professional Summary

Results-driven software engineer who excels in writing well *maintainable code* and adapting quickly to evolving technologies. I am also passionate about *value driven solutions, distributed systems* and *Gen AI*

Experience

Software Developer

Barclays

Pune, MH

Oct 2022 – Present

- Led the migration of four agent workflows from a legacy system to a Java microservices REST architecture, optimizing 18% of total traffic and enhancing security, which helped prevent \$0.7M worth of financial fraud.
- Improved service readiness time by 23% through DevOps enhancements using Docker, Jenkins, Kubernetes, and OpenShift.
- Managed production issue resolution with the RTB (Run the Bank) team, efficiently tracing logs and debugging within SLA limits.
- Facilitated cross-team collaboration while executing workflow migration, reducing technical debt and minimizing financial risks.
- Engaged in Agile ceremonies, mentoring new joiners/interns for a seamless onboarding experience.
- Led a team in a Q1 2023 hackathon, earning recognition for solving a critical problem statement internal to org.

Software Engineer

Raxa Health Information Services Pvt. Ltd.

Remote

Dec 2020 – Oct 2022

- Led the EMR product integration with Ayushman Bharat Digital Mission (ABDM), enabling the company's presence in health-tech listings.
- Migrated to an enhanced MRS ecosystem, fostering microservices, and boosting efficiency by 30%.
- Implemented containerization with Docker, deployed applications on AWS infrastructure, and executed logging & monitoring solutions.
- Implemented a new identity management service, improving user onboarding experience and strengthening security.
- Utilised Git for version control and Jira for tracking tasks, ensuring smooth project delivery.

Skills

Technical: Java, Openshift, Docker, Jenkins Sonarqube, Kibana, SQL Databases, AWS, Angular

Interpersonal: Gen AI driven solutions, Team lead, Project coordination and management

Education

JSS Academy of Technical Education, Noida

B.Tech in Electronics & Communication - CGPA: 8.4

Aug 2016 – Sept 2020

Projects

Synflow

github.com/padmash97/synflow

- Developed an workflow automation tool which integrates granular tasks to perform AI driven execution to accomplish it also utilizing advanced prompt engineering techniques.

Cosmos

github.com/padmash97/cosmos

- Conceptualized and developed an interactive astronomy learning platform offering real-time news, blog publishing, and NASA API-powered content.
